WATER METER VAULTS

Benefits

The Gillespie **thinking in the box** solution to pre-piped water meter vaults embraces careful planning and meticulous test fitting even before the installation of your water meter vault.

The result? Less chance for hold-ups during site installation due to bad weather, sizing errors, missing or incorrect parts.

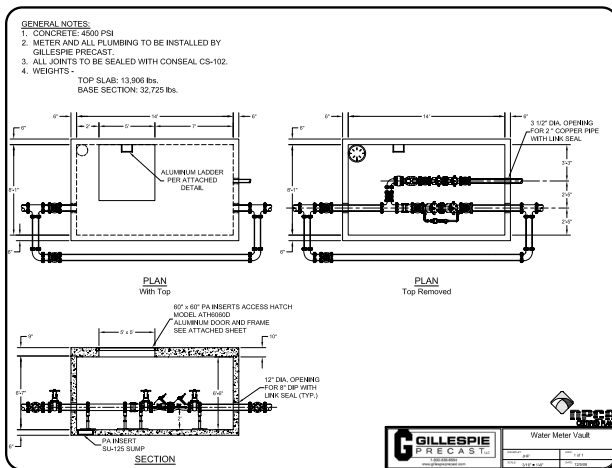

Benefit from our proven track record of successful pre-piped water meter vault installations:

- **Make Deadlines**
- **Save Money**
- **Proven Results**

PLANNING

Regulatory Expertise

Gillespie has on file the exact specifications and regulations that need to be adhered to for the various counties and municipalities which saves a lot of time in the planning process and guarantees a fully compliant installation.

PROCESS & APPROACH

Forms

Gillespie's forming system allows custom sizes of any dimension. Routine quality control checks ensure compliance within industry standards. All products are cast in our state of the art temperature controlled facility.

Concrete

Years of precast experience combines with a modern facility to produce high quality, consistent results. Our state of the art computer-controlled experience combines with a modern facility to produce high quality, consistent results. Our state of the art computer-controlled materials are essential in making a consistently strong final product.

Pre-piping

We do all the legwork making sure the right meter regulations are complied with, that all the parts fit correctly and the proper torque is applied. All the work is done inside in a controlled atmosphere that insures that the work is done properly with expert supervision.

Site Installation

Installation is simple and only requires that the hole be large enough to accommodate the vault and any by-pass piping. Simply connect to the inlet and outlet pipe stubs and you are done.

PROVEN RESULTS

Track Record

Gillespie has been manufacturing precast products for over 25 years and has successfully manufactured water meter vaults with major area contractors over the last 10 years.

Facility and Products

Gillespie Precast employs over 50 people along with a management team providing over 75 years combined experience. Our new modern 14,000 sq. ft. plant facility has interstate proximity. We also manufacture catch basins, curb inlets, manholes, electrical vaults, box culverts, pump stations, sand filters, headwalls, septic tanks and custom structures.

Certifications

We have been Maryland and Delaware D.O.T. certified to produce precast structures for the last 16 years and have also met the requirements of the National Precast Association Plant Certification Quality Control Program.
