

Custom & Standard Precast Box Culverts Built for Performance

Gillespie Precast designs and manufactures durable four-sided and three-sided box culverts, plus matching wing walls if applicable, in both standard and custom sizes.

Our in-house engineer is on call to assist with unique designs, and on every project we provide a value engineering analysis to ensure the most efficient and cost-effective solution.

Why Choose Gillespie Precast Box Culverts:

- **Versatile Applications** – Ideal for stormwater management, flood control, short-span bridges, and access ways.
- **Custom or Standard Sizes** – Built to your exact specifications.
- **Expert Engineering Support** – Guidance from concept through installation.
- **Strength and Durability** – High-performance precast concrete built to handle heavy loads and harsh environments.
- **Cost Savings through Value Engineering** – Optimize materials, design, and installation for maximum efficiency.

Result: Faster installs, reduced site disruption, and dependable performance that lasts for decades.

**"Five Generations. Built on Integrity.
Built to Last"**

Facilities

- With over 180 employees and a management team bringing more than 200 years of combined experience, we deliver proven expertise at every level
- 4 production plants located in Delaware, Maryland & North Carolina
- Over 3 and a half football fields of indoor production facilities outfitted with overhead bridge cranes with 100,000 lb max weight capacity

Certification

- Certified to produce precast for DOTs throughout the Mid-Atlantic—including VA, WV, MD, PA, NJ, and DE—as well as for leading energy and utility providers
- Gillespie's 3 plants are certified through the **NPCA** Plant Certification Quality Control Program

Why Gillespie Precast?

In 1922, George Edward Gillespie laid the foundation for what would become a lasting family legacy creating concrete blocks for a milk house on his small Sudlersville farm. Recognizing a growing need in the community, he brought his son Victor into the business, and together they established Gillespie & Son, Inc, moving operations to Chestertown, MD. As demand continued that vision has grown into a trusted family of companies five generations strong—Gillespie & Son, Inc, DCS and Gillespie Precast—serving the Mid-Atlantic with unmatched quality in ready-mix and precast concrete. With three NPCA-certified plants and a century of craftsmanship behind them, the Gillespie family continues to lead with heart. Every product is manufactured with care, every delivery is on time, and every customer and employee is treated like family—because to the Gillespies, they are.
