

Water Meter Vaults

Gillespie Precast provides fully assembled precast water meter vaults designed to manage large, complex piping and device assemblies. Our "Thinking Inside the Box" approach to pre-piped water meter solutions incorporates Value Engineering methods to maximize efficiency and reliability. Each vault is carefully planned and meticulously test-fitted at our facility well in advance of your installation.

The result? Reduced delays during site installation caused by bad weather, sizing errors, or missing/incorrect parts. Additionally, the vault's integrated access door ensures an optimal working environment, simplifying future testing, calibration, and maintenance of components.

Benefits & Features

- Pre-piped
- Cost Effective
- Custom sizes of any dimension
- Properly fitted before site installation
- Compliance with public water meter regulations
- Ease and speed of installation
- Pre-Tested for Quality Assurance
- Professionaly Engineered
- Quality Controlled Manufacturing
- Timed Deliveries
- Versatile and Cost Effective

**Five Generations Strong.
Built on Integrity.
Built to Last.**

Facilities

- With over 180 employees and a management team bringing more than 200 years of combined experience, we deliver proven expertise at every level
- 4 production plants located in Delaware, Maryland & North Carolina
- Over 3 and a half football fields of indoor production facilities outfitted with overhead bridge cranes with 100,000 lb max weight capacity

Certification

- Certified to produce precast for DOTs throughout the Mid-Atlantic—including VA, WV, MD, PA, NJ, and DE—as well as for leading energy and utility providers
- Gillespie's 3 plants are certified through the **NPCA** Plant Certification Quality Control Program

Why Gillespie Precast?

In 1922, George Edward Gillespie laid the foundation for what would become a lasting family legacy creating concrete blocks for a milk house on his small Sudlersville farm. Recognizing a growing need in the community, he brought his son Victor into the business, and together they established Gillespie & Son, Inc, moving operations to Chestertown, MD. As demand continued that vision has grown into a trusted family of companies five generations strong—Gillespie & Son, Inc, DCS and Gillespie Precast—serving the Mid-Atlantic with unmatched quality in ready-mix and precast concrete. With three NPCA-certified plants and a century of craftsmanship behind them, the Gillespie family continues to lead with heart. Every product is manufactured with care, every delivery is on time, and every customer and employee is treated like family—because to the Gillespies, they are.
